

Support Astronomer Fall 2008 On-Call Schedule

If you are experiencing problems, have operations questions, or are requesting permission to open during remote observing, please contact the Telescope Technicians (TT) at:
 - (831) 459-5952 (120" Read Out Room)
 - (831) 459-5907 (electronics lab)

If you have a technical question, need a refresher on an instrument/telescope or you can't reach a TT, contact the support astronomer on duty.

Support astronomers (SA) are generally available from early afternoon until sunrise. Due to short staffing, TT's and SAs may not always be available. Please always leave messages at each number you call. If you can't reach the on-duty SA, please try again in a few minutes. If that fails, try contacting an off-duty SA. If you can't reach a SA by phone, send an email to all of them and that will likely get a response from whomever is available.

The calendar is marked with the first initial of the SA who is on duty. A C indicates there is a scheduled instrument or telescope checkout. G indicates a group function. SVP or MoS is a ticketed Public Night
